

We are asking all patients to register for our online service, Doctorlink. If you need an appointment or a fit note, please use Doctorlink to contact us wherever possible.

Registration is simple and only takes a few minutes.

### **REGISTER HERE**

<https://app.doctorlink.com/johntaskerhouse/register> or by downloading the app on your mobile device via [Google Play](#) or the [App Store](#).

Doctorlink is designed by doctors to ensure you can safely assess your symptoms at any time. It provides advice and allows you to access services provided by your practice without waiting on the phone.

1. **Check your symptoms**

Answer a series of relevant questions based on your symptoms and concerns.

2. **Get guidance to the right care**

Doctorlink will advise on how to best manage your symptoms or seek the right healthcare service to suit your needs.

3. **Book an appointment with your GP** (or other clinician at your practice)

If advised, you will be able to book an appointment directly or a member of your surgery will contact you to book you in within the recommended timeframe. Where appropriate the information you provided in step 1 will help the clinical team member to care for you.

You must be 16 years old to register but you can use the symptom checker on behalf of your child (age 3 or above) or for people within your care who are registered at the same practice.

You can still contact the surgery in the normal ways if you do not have access to a computer or mobile phone.
